Dear Sir, Having seen in 'The Teacher's Aid'

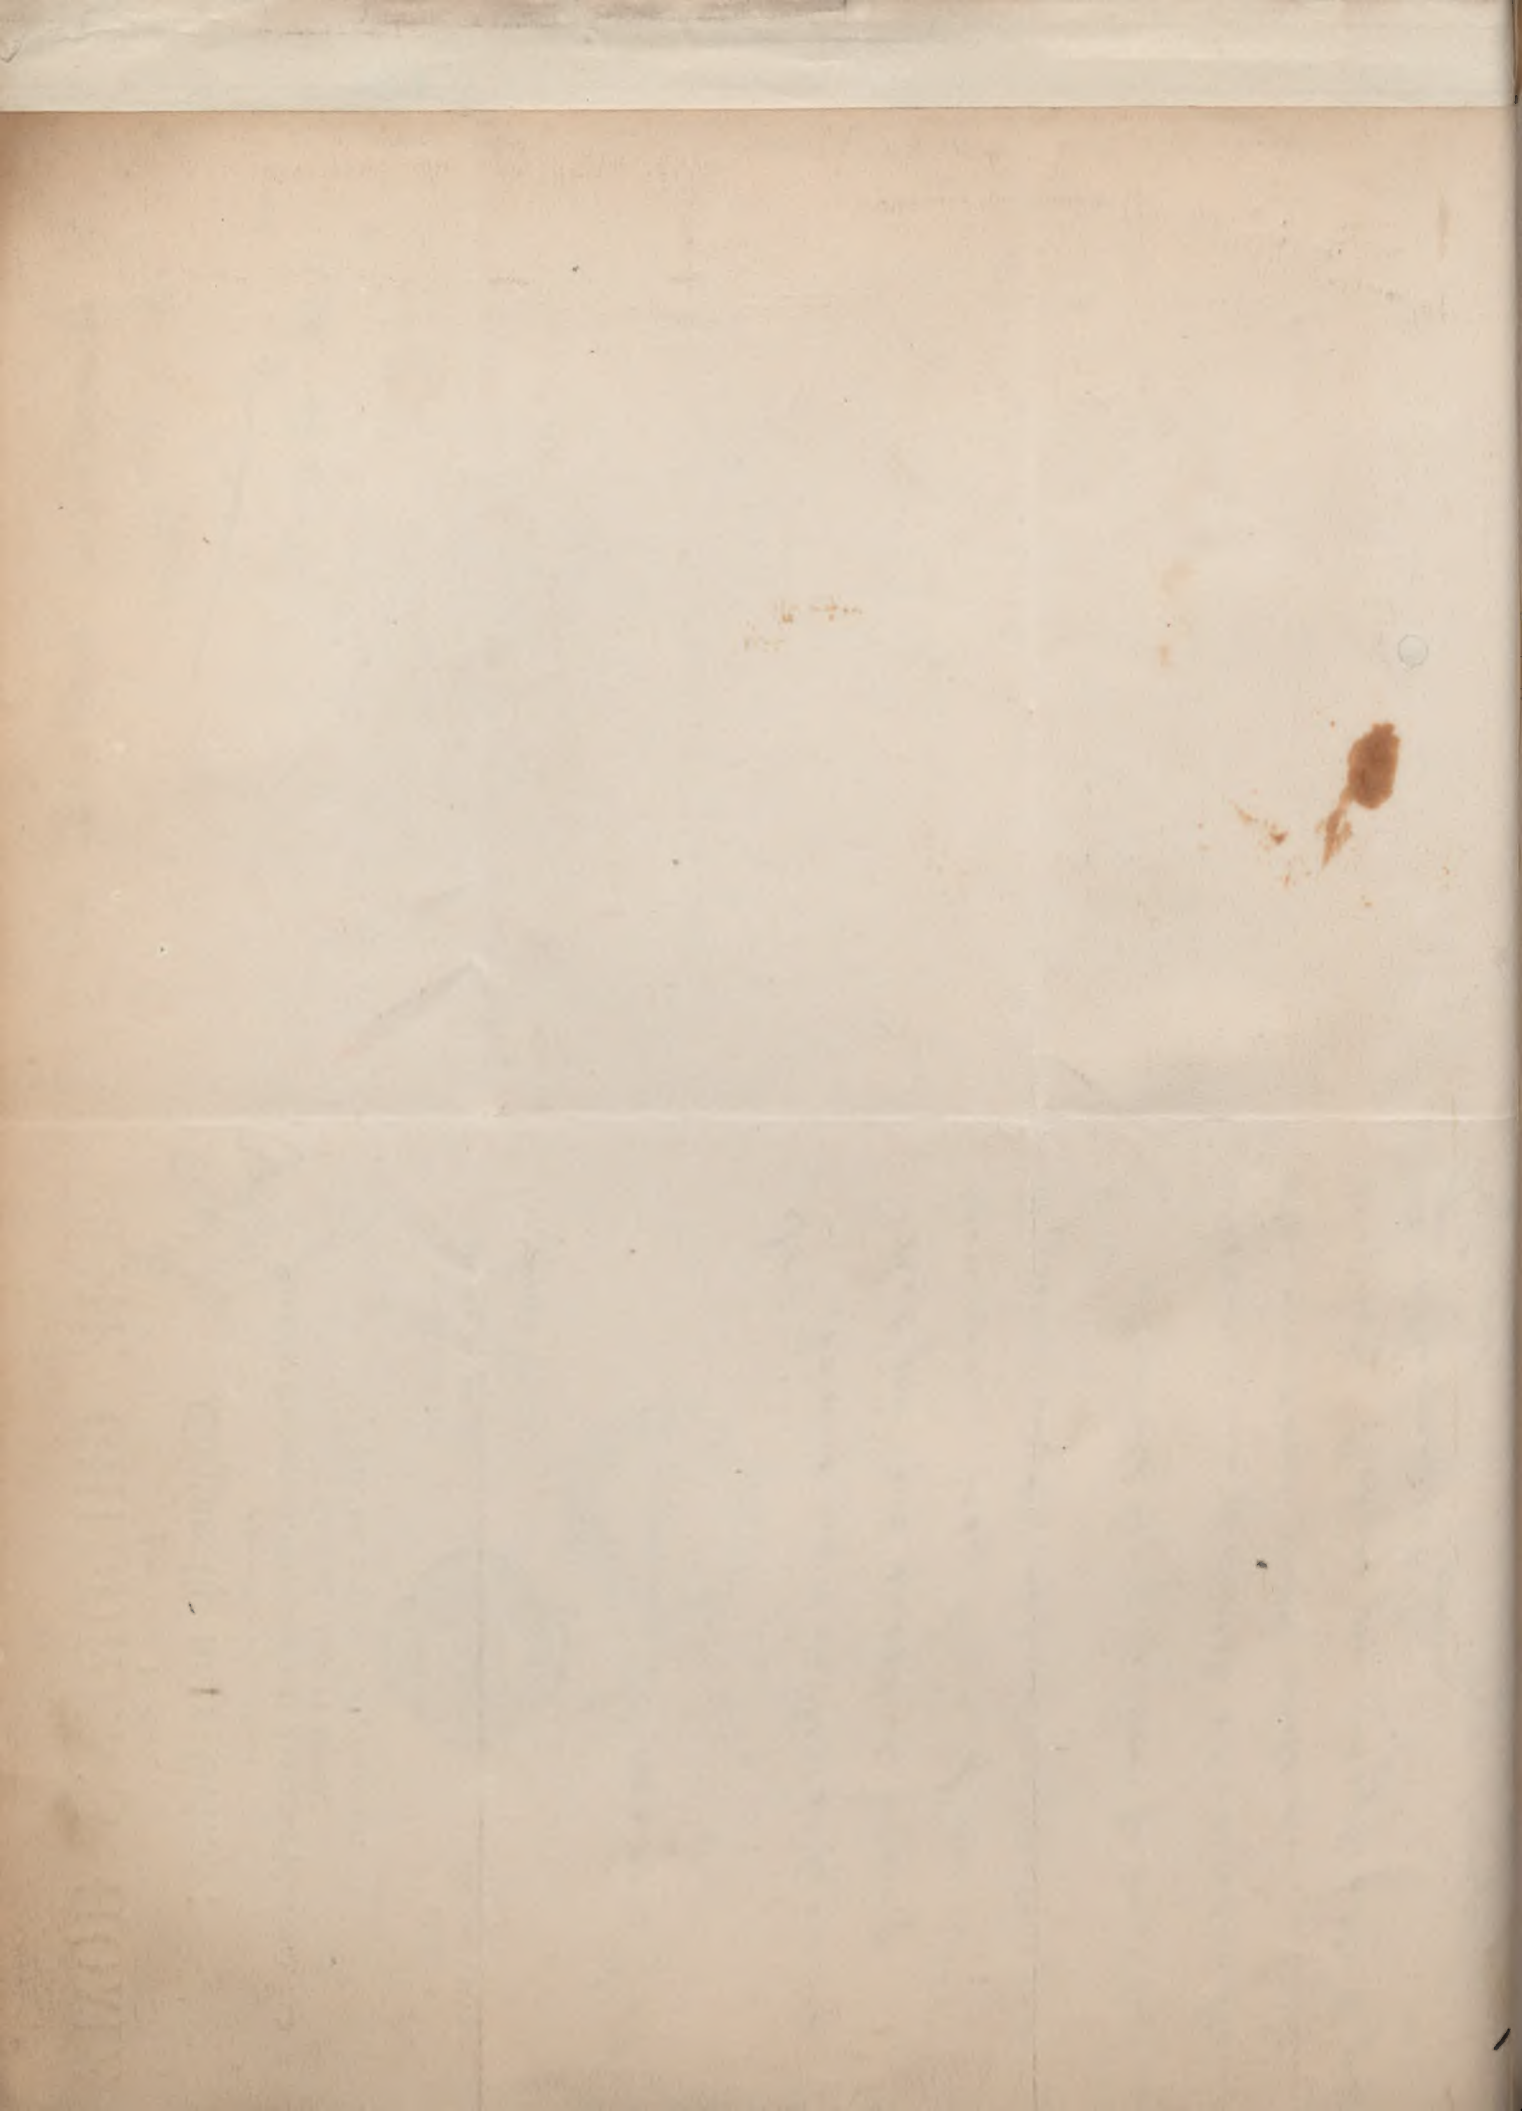

that you have supplied a case of
specimens, may I ask if you will

be good enough to extend a similar favor
to me? It would be a great boon to our children

who are in many respects, at a disadvantage
when compared with children in urban
districts. Hoping you may be able to forward

me in this respect, I am

Dear Sir

Wm. D. ...
I am endeavouring to establish a School Museum at the above school, for the purposes of illustrating lessons and also of widening the childrens knowledge on general subjects.

I should esteem it a great favour if you could kindly send me some specimens of native India rubber or any small specimens of that description which would, I am sure, be most acceptable.

The children here, far from a town know nothing of a museum and are ignorant of many things which would be thought common knowledge to every child.

If you would be so kind as to

Sir, Ack. Feb. 20th 1902

The Clerk of a neighbouring School Board has shown us a list of specimens which you have sent to their Manual Instruction Centre and I very earnestly request that our Board may be similarly favoured.

We have over 500 Boys receiving instruction in Woodwork, 40 at a time, under two instructors, and we also have classes of young men who come for instruction in same subject in the evenings.

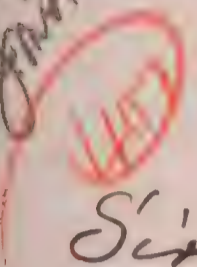

If you can spare us a few specimens they will be very greatly appreciated and of high educational value. My Board will guarantee that the specimens will be permanently retained for reference & exhibition.

Dear Sir,

On behalf of the Managers of the New Richmond Public School, I desire to very cordially thank you for sending to the School a parcel of Museum specimens.

Unhappily recent unforeseen events will compel the Managers to close the School at an early date. Under these circumstances we think it only right that your opinion as to the destination of these specimens should be solicited. No doubt many of the Schools in Richmond and many more in the West of London, would be only too glad to possess them. If you think fit, the Managers would be glad to transfer them to some deserving Richmond School, so that they may be retained for Educational purposes.

Dear Sir

I have been informed that, by making application to you, I can be supplied with various specimens of timber, Cones, &c. I shall be exceedingly obliged if you will kindly furnish me with a number sufficiently large to be of service to me, when giving lessons to my boys on the various kinds of timber. I have specimens of the following woods. - Yellow Pine. Yellow Deal. American Walnut, but any other kinds will be very acceptable, I should like a few if possible, showing the complete annual rings and bark, (Larch for instance would be a very good one). I will of course, pay the carriage of any specimens which you may be able to send me. Please label them. Thanking you in anticipation for the favour of a reply.

Dear Sir,

We have been endeavoring to
 to form a school museum. Up to
 the present time the objects have
 been the gifts of local firms,
 teachers, & scholars.

The Headmaster would be greatly
 obliged if you could assist
 us by sending any suitable

I am sorry the parcel
was so knocked about
in transit. All the seeds
were out & mixed up.

The large long pod
was smashed, and the
pretty branches of
cypress with fruit were
all smashed up beyond
recognition. Being dry

Mrs. I have received a parcel

today from you in
which a charge of
1/3 was made for
carriage. I did not
write about it and
I think some mistake
has been made. I
am the only head
mistress here, and
my school is for

Infants, and the
Parcel sent - is no
use to see.

There is a mixed
school under a
Master, but neither
he nor his staff
seem to know anything
of it.

If you would give
me the name of the
person who wrote you
I could forward &
